

## ***Be Calmed and Go Boating***

The simple pleasures of boating allow you to relax in this sometimes crazy world.

Enter the blissfully peaceful world of the displacement cruiser.

Typically, displacement bay cruisers are designed with high bulwarks, walk around decks and have an efficient layout. The design and look speaks of the majestic grandeur and simplicity of the displacement cruiser.

The Cape Morton 30, is a prime example of these type of boats. When first designed they were heralded as an ideal displacement bay cruiser and featured on the front page of Australian Boating Nov 1987.

Their well-proportioned lines come from being a hard-chined "Sharpie" style trawler. The coach house roof elegantly extends over the walkways and with the slide doors near the helm, offer easy access, fresh air & protection from the elements. A large saloon, aft of the helm, is ideal for entertaining and the opening saloon windows, provide good airflow, light and visibility. The well-designed galley provides ease of catering when underway and at anchor.

Passagemaking in a displacement cruiser is best described as:

*"Cruising at 6 to 7 knots, your progress is judged by different values and you are, quite simply, at sea, savouring the wide horizons".*

*(Ref: <http://www.mby.com/cruising/slow-displacement-cruising-46599>)*

A Cape Moreton 30 has just been listed for sale at Tin Can Bay Boat Sales. She has been maintained to a high standard and is well presented.

Priced to meet the market, she presents with a new 87 kw turbo diesel Yanmar shaft drive diesel, new gearbox, stern gland and re-pitched prop.

Marina berth lease also for sale.
